# ECODRUM

Ecodrum GD medium and large  
Ecodrum HD

a happy planet product

**CYCLUS**

*Cyclus is the brand for circular products for in and around your home and garden!*

We strive for an environmentally friendly world and breathe new life into discarded products (or parts thereof). In this way, we reduce the environmental footprint and contribute to a circular society.

A circular society is one in which waste does not exist; residual goods are the raw materials for new products or are reabsorbed by nature. A circular society is also one in which we no longer have a negative impact on the ecosystems around us. For example, we can use old products in new, recognisable or unrecognisable products.

**We call this upcycling!**

And that is right up Cyclus' alley! It makes everyone happy. And that includes our planet! **'A happy Planet'**

**ECODRUM** 

**FROM WASHING MACHINE DRUM IN THE RUBBISH DUMP TO SUSTAINABLE FIREBASKET IN YOUR GARDEN.**

The Cyclus EcoDrum is such an upcycled product! Everyone immediately recognises the washing machine drum. Instead of it ending up on the scrap pile, we have given this high-quality stainless steel part a second function: a sustainable fire basket! So that you can enjoy wonderful atmospheric evenings in your own garden.

**Cyclus Ecodrum Medium GD**

Height 47 cm  
Diameter 49 cm  
Weight 9 kg  
Stainless Steel

**Cyclus Ecodrum Large GD**

Height 53 cm  
Diameter 49 cm  
Weight 9,2 kg  
Stainless Steel

**Cyclus Ecodrum HD**

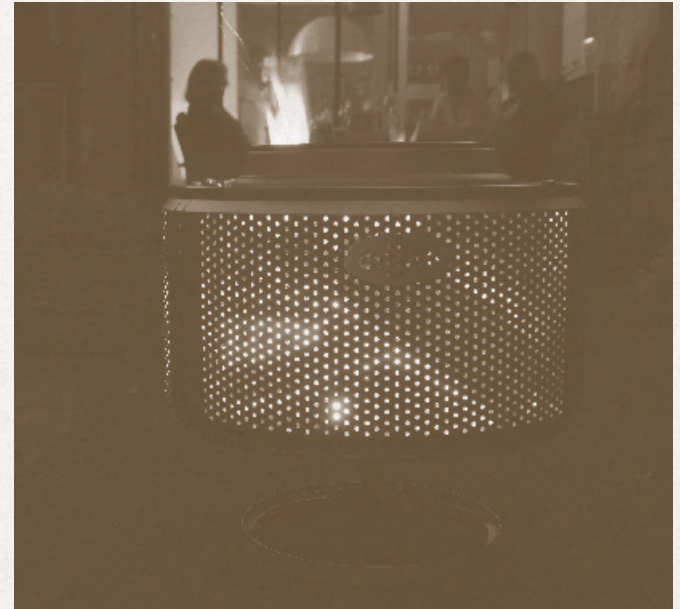

Height 49 cm  
Diameter 49 cm  
Weight 7,6 kg  
Stainless Steel

The EcoDrum has a large opening at the top through which the firewood can easily fit. The round fire basket also has small holes through which you have a splendid view of the moving flames and are not bothered by jumping fire particles.

All parts of the EcoDrum are made from recycled parts or materials. That includes the box, the manual that comes with it, tape and the packaging material! For example, the transport box of the Ecodrum is FSC certified. FSC is a guarantee that forests are managed sustainably. In an FSC-certified forest, nature is protected and new trees are planted once the forest has been cut down.

This contributes to a CO<sub>2</sub>-neutral cycle and thus fits completely within the Cyclus-concept!

With the Cyclus EcoDrum you get a 100% sustainable fire basket in your home, which brings warmth and atmosphere to your garden. Plus, a fire basket that contributes to the improvement of the circular society.

## WARNING

Keep these instructions for future reference. Never leave the article unattended when burning! Remove all decoration and packaging material before use. Place the article on a suitable, safe, straight, heat-resistant surface, out of reach from decorations and flammable materials such as alcohol.

**CAUTION:** Do not use alcohol, petrol or similar liquids for lighting or re-lighting! Do not use too much wood. Make sure that the ground-material can withstand any hot or burning wood that may fall.

**WARNING!** To be used outdoors only by adults or under parental supervision. Never leave the burning article unattended. Keep a sufficient distance and never move the burning product.

**CAUTION!** This article will become very hot, do not move/touch it during use. Extinguish the fire if the flame is abnormally large, cover the article with a fire blanket. Do not blow it out and do not use water.
